... SPECIALIST FOR PIPELINE SYSTEM SERVICE

FASTRA

FASTRA, s.r.o. focuses on matters related to servicing all types of product pipelines, such as gas, water, oil pipelines, and sewer systems, etc.

The company was founded in 1992, and its headquarters are located in Skalka – a district of the village Libenice, east of Prague.

The company's extensive activities fall into two main categories.

Our first field of expertise focuses on the creation of complex solutions related to technologies used when working on product pipelines of media under pressure in a potentially explosive environment. We have developed and manufactured special equipment that allows ballooning, stopping, drilling, cutting and other similar operations on pipelines without any medium leakage. In this field of our activities, we have achieved great successes both in the Czech Republic and abroad. Our achievements rely not only on many years of practice but also on combining production, development, trade, consulting and repair services; thus, we can get feedback from our customers that allows us to respond flexibly to our customers' needs. We have all the appropriate authorisations and certificates for our products and services.

Our second sphere comprises business activities. We sell our products and equipment, as well as other components and products needed for service activities on product pipelines.

In connection with that activity, we also represent some foreign companies on the Czech market. In cooperation with designers and construction companies, we also provide comprehensive material supplies directly to construction sites. In addition, we are also able to supply unique systems that used for temporary sealing of various pipes and shafts, or complete flood protection systems for buildings.

We also organise training courses and lectures.

PRODUCTS

PIPELINE DRILLING EQUIPMENT

Diameter of the drilled pipeline:	Unlimited
Diameter of the drilled aperture:	Up to 400 mm*
Pressure in the drilled pipeline:	Up to 40 bar (or even more depending on the medium)
Material of the drilled pipeline:	Metal, plastic, asbestos-cement
Media in the drilled pipeline:	Natural gas, oil, toxic gases, water, non-aggressive gases and liquids
Working temperature:	-20/+70 °C

* In case of using additional accessories (reduction chambers, crowns), it is possible to drill apertures up to diameter 700mm.

PIPELINE SEALING EQUIPMENT – BALLOONS AND BALLOON KITS

Diameter of the sealed pipeline:	Up to 1400 mm (even larger)
Pressure of the sealed pipeline:	Up to 5 bar
Material of the sealed pipeline:	Metal, plastic, asbestos-cement, concrete
Media in the sealed pipeline:	Natural gas, oil, toxic gases, water, non-aggressive gases and liquids
Working temperature:	-10/+130 °C

PIPELINE SEALING EQUIPMENT – STOPPLING KITS

Diameter of the sealed pipeline:	Up to 500 mm
Pressure of the sealed pipeline:	Up to 40 bar
Material of the sealed pipeline:	Metal, plastic, asbestos-cement, concrete
Media in the sealed pipeline:	Natural gas, oil, toxic gases, water, non-aggressive gases and liquids
Working temperature:	-10/+130 °C

COMPONENTS FOR WORK ON PIPELINE SYSTEMS

T-shaped pieces, patches, stoppling and balloon necks

Diameter of the sealed pipeline:	According to customer requirements
Material of the sealed pipeline:	Metal, plastic, asbestos-cement, concrete
Media in the sealed pipeline:	Natural gas, oil, toxic gases, water, non-aggressive gases and liquids
Working temperature:	-10/+130 °C

AUXILIARY EQUIPMENT FOR WORK ON PIPELINE SYSTEMS

Pneumatic or hydraulic saws, clamps, mechanical closures, kits for sealing the pipelines

Diameter of the sealed pipeline:	Up to 1400 mm
Material of the cut pipeline:	Steel, cast iron, plastic
Working temperature:	-10/+70 °C (even more depending on the medium)

SERVICES

As a part of our comprehensive customer services, we provide a wide range of service activities on product pipelines. Our qualified staff performs maintenance by using equipment manufactured by FASTRA. Our services include drilling and temporary sealing of pipelines with under pressure medium utilising leak-less technologies.

We have the appropriate authorisations and certificates to perform such activities.
